Matthew Lau
Artist, Singapore

My work explores the relationship between people and machines through interactive light. Light is a medium that connects across different kinds of understanding, and through responsive lighting environments I turn abstract computational ideas into sensory experiences that can be felt before they are explained.

By making visible what usually stays hidden — the algorithms, processes and machine-learning principles that increasingly shape our world — the work pushes back on the idea of artificial intelligence as an inscrutable black box. Earlier pieces made latent spaces legible as colour and light. The newer ones ask what such a system does when it is left alone with itself, learning from its own output until its range collapses.

Underneath this is a belief that technology should deepen human connection rather than thin it out. The installations treat the machine as a collaborator rather than a tool, setting up a dialogue in which human intention and computational process both shape what is finally seen.

Education

Master of Professional Studies, Interactive Telecommunications
New York University, Tisch School of the Arts, ITP, New York — 2023–2025

Thesis: *Ambi(latent) Space* — Edge Machine Learning for Adaptive Lighting Systems. IMDA SG Digital Postgraduate (Media) Scholarship.

BA (Hons) Design Communication, First Class Honours
LASALLE College of the Arts, Singapore — 2020–2022

Dissertation: *Hello, I'm Here* — Affective Computing Light Installation, from Affective Communication Research. LASALLE Scholarship.

Diploma in Design Communication, with Distinction
LASALLE College of the Arts, Singapore — 2014–2017

A foundation in design communication and core design principles, and in how design shapes cultural and social contexts.
