Matthew Lau

I am a creative technologist and artist working at the intersection of computational design, emerging technology and light. My experience spans building AI-driven tools and interactive media for global brands, at Accenture Song and through my studio Organised Mess, to creating installations that translate computational systems into human-centred experiences. In my own practice, shown in Singapore and New York, I use machine learning and custom hardware to make the processes inside a system visible as light in a room.

Whether prototyping for clients or developing my own practice, I combine technical experimentation with design-led thinking to deliver outcomes that are both innovative and tangible.

Skills

AI / ML
TensorFlow, PyTorch, TensorFlow Lite, TinyML, Edge ML, Computer Vision, Generative AI APIs, Google AI Studio, ComfyUI

Programming
JavaScript, Python, C++, Arduino, Processing, GLSL

Web / Interactive
Node.js, HTML/CSS, React, p5.js, Three.js, Web APIs, TouchDesigner, Max/MSP

Networking / Protocols
MQTT, TCP/UDP, HTTP/HTTPS, WebSockets, OSC, Serial

Hardware
Arduino, ESP32, Raspberry Pi, PCB design, Soldering, IoT systems, Sensors, Motors, Prototyping

Installation / AV
Projection mapping, Pixel mapping, DMX lighting control, MadMapper

Cloud / Data
AWS, Google Cloud, Microsoft Azure, Firebase, APIs, Real-time data processing & visualisation

Education

Master of Professional Studies, Interactive Telecommunications

New York University, Tisch School of the Arts, ITP (New York) 2023–2025

Thesis: *Ambi(latent) Space* — Edge Machine Learning for Adaptive Lighting Systems. IMDA SG Digital Postgraduate (Media) Scholarship.

- Built a lighting fixture with embedded TinyML models that actively controls light quality based on productive lighting principles while balancing human preferences through real-time environmental data and human input.
- Cultivated a practice bridging design, making and critical thinking: custom electronics and networked systems (*Hello, I'm Here Communicators*), generative AI (*The Ascension Algorithm*) and interactive light installations, alongside the curation and preservation of new media art, generative algorithms and data-driven practice.

—

BA (Hons) Design Communication, First Class Honours

LASALLE College of the Arts (Singapore) 2020–2022

Dissertation: *Hello, I'm Here* — Affective Computing Light Installation, from Affective Communication Research. LASALLE Scholarship.

- Designed an interactive installation using machine-learning facial expression recognition and electronics to translate human emotions into coloured LED visualisations.
- Developed a practice bridging graphic and computational design through generative systems (*Generative Type Tool*), physical controllers for visual composition (*DJ Heard That?!*) and proposals on digital consumption's environmental impact (*Breathing Bytes*).

—

Diploma in Design Communication, with Distinction

LASALLE College of the Arts (Singapore) 2014–2017

A foundation in design communication and core design principles, and in how design shapes cultural and social contexts.

—

Work experience

Creative Technologist

Accenture Song (Singapore) 2026–

October 2026 – present.

- Partner with creative directors, writers, art directors and designers from the earliest stages of a brief to shape ideas with technology at their core — the bridge between "what if we could" and "here's how we could actually do it."
- Rapidly prototype, test and validate technology-led concepts: interactive demos, working tools, campaign experiences and proofs of concept, assessing feasibility and production considerations early.
- Identify and manage technology, production and innovation partners, from briefs and scopes to a viable path from prototype to production.
- Act as the team's technology radar: workshops, demos and experiments with AI and emerging tools that keep the creative team fluent in what's possible.

—

Founder & Creative Technologist

Organised Mess (Singapore) 2023–

Independent creative technology studio: embedded systems, physical computing, custom hardware, interactive installations and generative work for clients and collaborators.

—

Independent art practice

New York | Singapore 2022–

- Interactive light installations exploring human–machine relationships, exhibited in group shows in New York (*Deconstructed Ambiance*) and Singapore (*Deconstructed Colours*).
- Custom hardware and software integrating machine learning, microcontrollers and real-time data for objects such as *Circulated Densities*.

—

Creative Technologist

Accenture Song (New York | Singapore) 2023–2024

New York, Nov 2023 – Oct 2024. Singapore, Jun – Aug 2023.

- Architected and prototyped multi-modal AI solutions for global enterprise clients, shaping new ways for brands to explore generative AI in marketing and operations.
- Led technical evaluation of emerging AI tools and platforms, with assessment frameworks and capability demonstrations for senior leaders and clients.
- Coordinated cross-functional teams and external vendors to turn experimental AI concepts into usable prototypes.

Design tools

Adobe Creative Suite (Photoshop, Illustrator, InDesign, After Effects, Premiere Pro), Figma, Rhino3D, Keyshot, Fusion 360, KiCad

Fabrication

3D printing, Laser cutting

—

Technology & Creative Intern

R/GA (Singapore) 2022

Jul – Dec 2022.

- Built machine-learning and generative AI tools integrated into pitch strategies for Shangri-La Hotels and Resorts.
- Developed AR experiences for Samsung campaigns.
- Prototyped creative-coding concepts for client work and internal R&D (*Hey, What's Up?*).

—

Designer

Neuewave/MDRN (Singapore) 2021

May – Aug 2021.

- Assisted the artists with *The Oort Cloud and the Blue Mountain*, shown at the Children's Biennale 2021 (Dresden and Groningen) and Singapore Art Week 2022.
- Assisted with *NewWave* (shown as *Sea of Debris* at Archifest 2021), a kinetic object using sensors and motors to raise awareness of ocean waste.

—

Graphic Designer

BUREAU (Singapore) 2019–2020

Contract, Oct 2019 – Mar 2020.

- Developed visual identity systems and integrated campaigns for multinational clients including Facebook, BASF and Hotel Properties Limited, keeping brands consistent across print and digital.

—

Junior Graphic Designer

Studio Swell (Singapore) 2016–2017

Internship, Nov 2016 – Jan 2017. Contract, May – Sep 2017.

- Designed editorial layouts, brand identities and visual communication systems for arts organisations including LASALLE College of the Arts and Esplanade – Theatres on the Bay, across print, digital and environmental graphics.

—

Group exhibitions

Reconstructed Colours 2026
Techno Terra: Archive of the Future, Gallery 1, Institute of Contemporary Arts Singapore

Forms Drifting, in collaboration with Neuewave/MDRN 2026
I SAW IT, Singapore Art Week 2026, Flock at Kampong Java, Singapore

Circulated Densities 2025
Singapore: A Design Thesis in the Making, Gallery 1, Institute of Contemporary Arts Singapore

Deconstructed Ambiance 2025
Beyond Interface & Prompt: Exploring the Language of Technology in Contemporary Art, WAH Center (Williamsburg Art & Historical Center), Brooklyn, New York

Ambi(latent) Space 2025
to be CONTINUED – a work in progress show, NYC Resistor, Brooklyn, New York

Deconstructed Colours 2023
Threads: A Critical Craft Collective Experiment, Draft #2, Earl Lu Gallery, Institute of Contemporary Arts Singapore

The Oort Cloud and the Blue Mountain, with Neuewave/MDRN, Andreas Schlegel & Hazel Lim-Schlegel 2022
Singapore Art Week 2022, Tanjong Pagar Distripark, Singapore

ASICS Art in Motion Campaign 2022
Pop-up activation, Alchemist, Design Orchard, Singapore

NewWave (shown as *Sea of Debris*), in collaboration with Neuewave/MDRN 2021
Archifest 2021, Singapore

NewWave, in collaboration with Neuewave/MDRN 2021
Farewell To Reason, by (KSY) Nathan Yong, Industry+, Singapore

The Oort Cloud and the Blue Mountain, with Neuewave/MDRN, Andreas Schlegel & Hazel Lim-Schlegel 2021–2022
Kinderbiënnale 2021, Groninger Museum, Groningen, Netherlands

The Oort Cloud and the Blue Mountain, with Neuewave/MDRN, Andreas Schlegel & Hazel Lim-Schlegel 2021–2022
Children's Biennale 2021, Japanisches Palais, Staatliche Kunstsammlungen Dresden, Germany
